Personal Summary

Having successfully passed a Full Stack Web development Boot Camp with University of Birmingham, I am looking to pursue a career in Software Development.

I have a passion for Web development and am committed, contentious and creative and have strong organisational and communication skills.

I'm based in Birmingham, and have a clean current UK driving license and I'm willing to work locally, remotely or hybrid for the right opportunity.

Work experience (Voluntary)

Many of the skills I have learned to date will be beneficial to my future role in the technology sector. These include excellent organisational, leadership and social skills as well as strong mathematical, problem-solving skills. I am familiar and competent with the latest technology; often helping others with technological issues. I am also keen to tap into my creative side, having a flair for art.

Technical skills

I have just completed the Full Stack Coding Bootcamp course, with University of Birmingham. We undertook a number of assignments and group projects which included code refactoring, front end design, back-end development, databases and web applications, using the following technologies:

HTML, CSS, Git, JavaScript, Third-party APIs (jQuery, Bootstrap), Server-side APIs, AJAX, and JSON, Node.js, Object-oriented programming (OOP), Express.js servers, MySQL, Object-relational mapper [ORM] (Sequelize), Model-view-controller (MVC) framework (Handlebars.js), Unit testing, Agile methodology, Heroku, Computer science, Portfolios, MongoDB and NoSQL, Progressive web apps (PWAs), React, MERN.
